

Cutting Activities

Written by Sue Lambert and Sandi Rickerby

Published by World Teachers Press®

Foreword

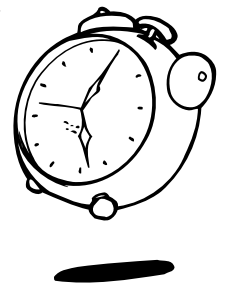

The *Early Skills Series* of books is designed to give students practice in a range of early reading, writing and number activities as well as developing perceptual and fine motor skills in the early years.

Early Skills Series – Cutting Activities provides students with the opportunity to practice their fine motor skills as well as early perceptual skills in the area of space. Using this book students will complete activities such as making jigsaw puzzles, drawing symmetrical shapes and constructing given pictures. These can then be pasted into the frame on page 47, or onto a blank sheet of paper.

The worksheets can be used to motivate students to work independently, increase their concentration span and develop their ability to work in an orderly fashion; encouraging them to take pride in the presentation of their work at the same time.

The worksheets are bold, uncluttered and visually appealing to young students. They contain instruction in graphic form, thereby requiring minimum support from the teacher. They can be used to teach a new skill or to reinforce and consolidate those already taught.

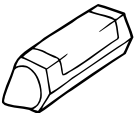

Other books in this series are: *Early Skills Series – Counting and Recognition to Five*
Early Skills Series – Addition to Five
Early Skills Series – Early Visual Skills

Contents

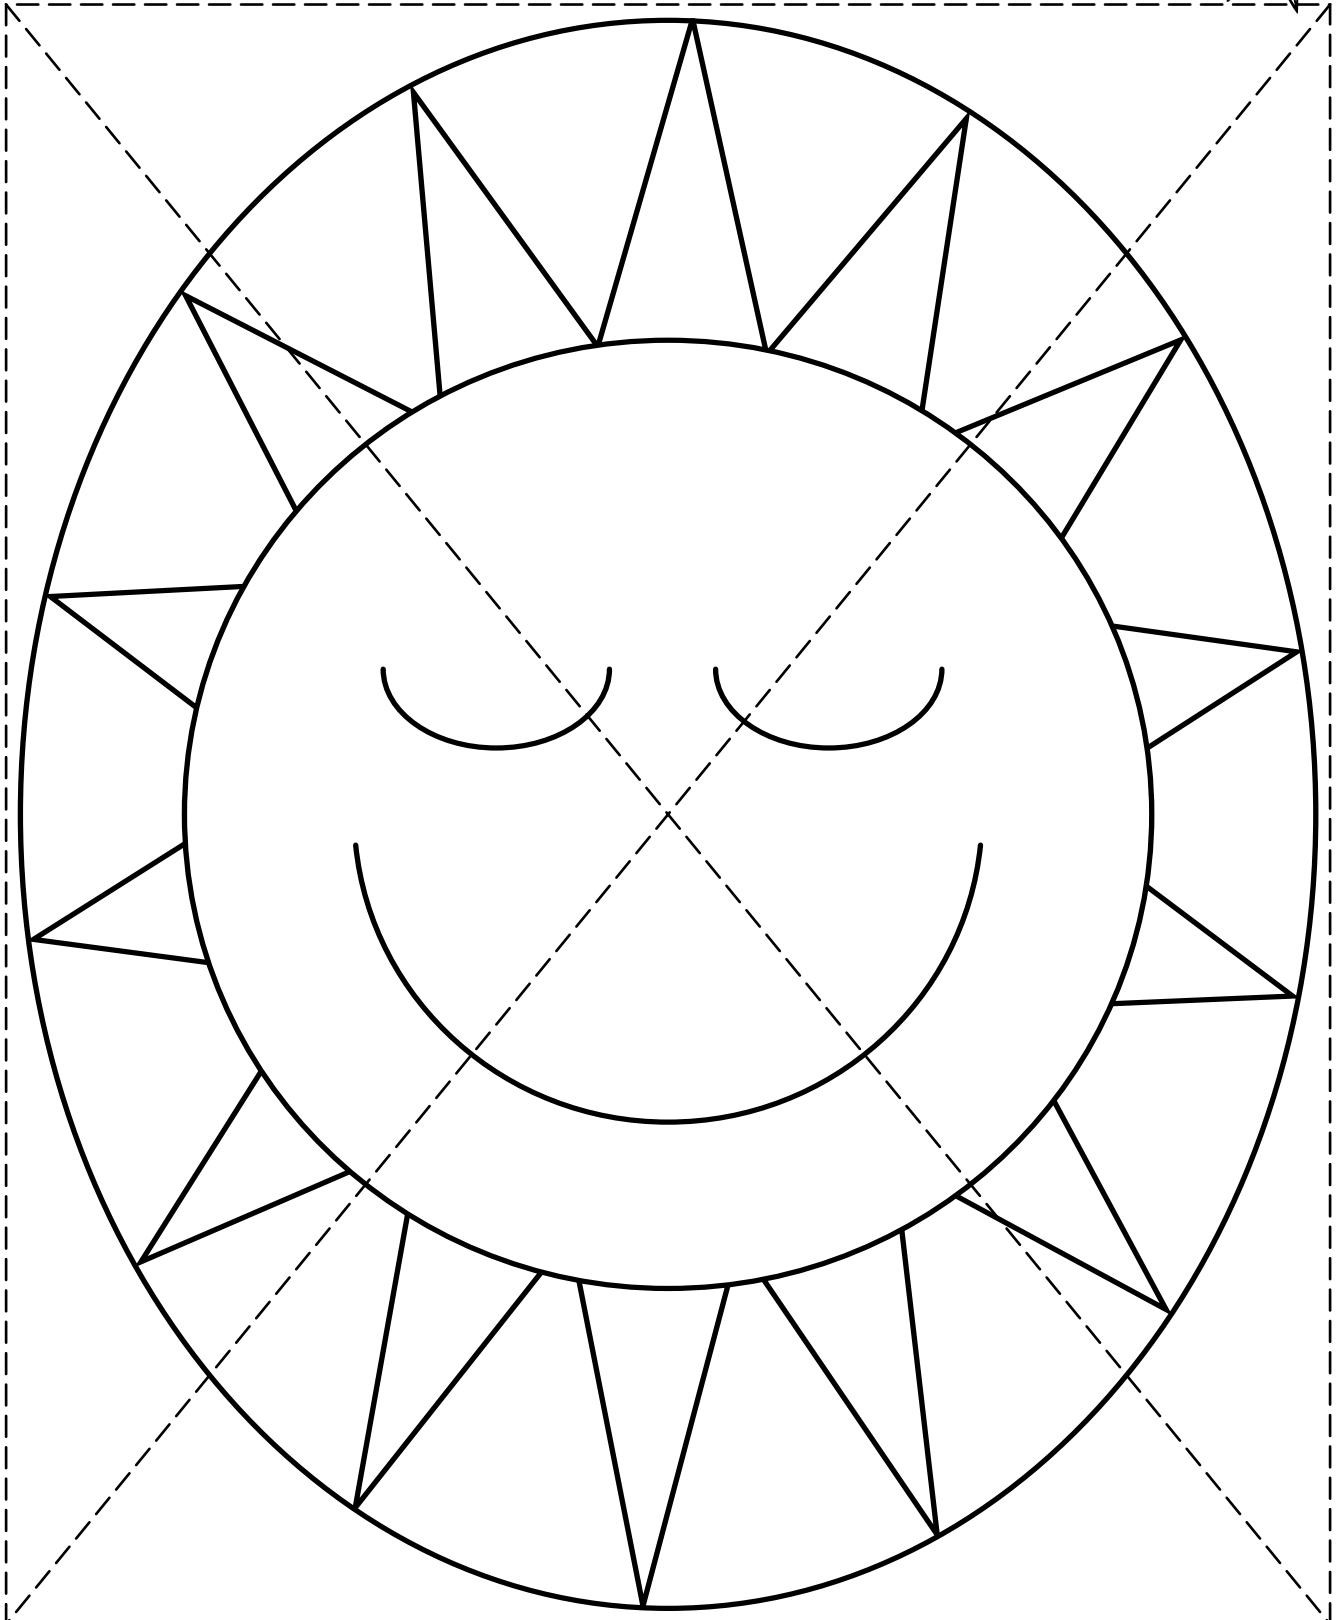

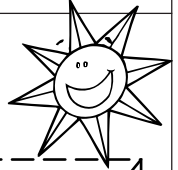

<i>Teacher Information</i>	4	<i>Whale Jigsaw</i>	27
<i>Key</i>	6	<i>Star Symmetry</i>	28
<i>Snail Jigsaw</i>	7	<i>Club Symmetry</i>	29
