

# Common Core Collaborative Cards - Number System (NS) \& Functions (F) 

Correlation to the Common Core State Standards

## Grade 6 Deck

| Apply and extend previous understandings of multiplication and division to divide fractions by fractions. |  |  |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 6.NS.1. | Interpret and compute quotients of fractions, and solve word problems involving division of fractions by fractions, e.g., by using visual fraction models and equations to represent the problem. | $\times$ |  |  |  |  | $\times$ | $\times$ |  |  |
| Compute fluently with multi-digit numbers and find common factors and multiples. |  |  |  |  |  |  |  |  |  |  |
| 6.NS.2. | Fluently divide multi-digit numbers using the standard algorithm. |  | $\times$ |  |  |  |  |  |  |  |
| 6.NS.3. | Fluently add, subtract, multiply, and divide multi-digit decimals using the standard algorithm for each operation. |  |  |  | $\times$ | $\times$ |  |  | $\times$ | $\times$ |
| 6.NS.4. | Find the greatest common factor of two whole numbers less than or equal to 100 and the least common multiple of two whole numbers less than or equal to 12 . Use the distributive property to express a sum of two whole numbers 1-100 with a common factor as a multiple of a sum of two whole numbers with no common factor. |  | $\times$ | $\times$ |  |  |  |  |  |  |

Apply and extend previous understandings of numbers to the system of rational numbers.

|  | Understand that positive and negative numbers are used together to <br> describe quantities having opposite directions or values (e.g., tempera- <br> ture above/below zero, elevation above/below sea level, credits/debits, <br> positive/negative electric charge); use positive and negative numbers to <br> represent quantities in real-world contexts, explaining the meaning of 0 <br> in each situation. |  |  |  |  |  |  |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| 6.NS.6. | Understand a rational number as a point on the number line. Extend <br> number line diagrams and coordinate axes familiar from previous <br> grades to represent points on the line and in the plane with negative <br> number coordinates. | $\mathbf{x}$ |  |  |  |  |  |
|  | a. Recognize opposite signs of numbers as indicating locations on <br> opposite sides of 0 on the number line; recognize that the opposite of <br> the opposite of a number is the number itself, e.g., -(-3)=3, and that 0 <br> is its own opposite. |  |  |  |  |  |  |
|  | b. Understand signs of numbers in ordered pairs as indicating locations <br> in quadrants of the coordinate plane; recognize that when two ordered <br> pairs differ only by signs, the locations of the points are related by <br> reflections across one or both axes. |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |
|  | c. Find and position integers and other rational numbers on a horizontal <br> or vertical number line diagram; find and position pairs of integers <br> and other rational numbers on a coordinate plane. |  |  |  |  |  |  |

## Common Core Collaborative Cards - Number System (NS) \& Functions (F)

Correlation to the Common Core State Standards

Grade 6 Deck

| 6.NS.7. | Understand ordering and absolute value of rational numbers: |  |  |  |  |  |  |  |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
|  | a. Interpret statements of inequality as statements about the relative <br> position of two numbers on a number line diagram. |  |  |  |  |  |  |  |
|  | b. Write, interpret, and explain statements of order for rational numbers <br> in real-world contexts. |  |  |  |  |  |  |  |
|  | c. Understand the absolute value of a rational number as its distance <br> from 0 on the number line; interpret absolute value as magnitude for a <br> positive or negative quantity in a real-world situation. |  |  |  |  |  |  |  |
|  | d. Distinguish comparisons of absolute value from statements about <br> order. |  |  |  |  |  |  |  |
| 6.EE.8. | Solve real-world and mathematical problems by graphing points in <br> all four quadrants of the coordinate plane. Include use of coordinates <br> and absolute value to find distances between points with the same first <br> coordinate or the same second coordinate. |  | $\mathbf{x}$ | $\mathbf{x}$ |  |  |  |  |

# Common Core Collaborative Cards - Number System (NS) \& Functions (F) 

Correlation to the Common Core State Standards

Grade 7 Deck
Apply and extend previous understandings of operations with fractions to add, subtract, multiply, and divide rational numbers.

| 7.NS.1. | Apply and extend previous understandings of addition and subtraction to add and subtract rational numbers; represent addition and subtraction on a horizontal or vertical number line diagram: |  |  |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | a. Describe situations in which opposite quantities combine to make 0 . |  |  |  |  |  |  |  |  |  |  |
|  | b. Understand $p+q$ as the number located a distance $\|q\|$ from $p$, in the positive or negative direction depending on whether $q$ is positive or negative. Show that a number and its opposite have a sum of 0 (are additive inverses). Interpret sums of rational numbers by describing real-world contexts. |  |  |  |  |  |  |  |  |  |  |
|  | c. Understand subtraction of rational numbers as adding the additive inverse, $p-q=p+(-q)$. Show that the distance between two rational numbers on the number line is the absolute value of their difference, and apply this principle in real-world contexts. |  |  |  |  | $\times$ |  |  |  | $\times$ |  |
|  | d. Apply properties of operations as strategies to add and subtract rational numbers. |  |  |  |  |  | $\times$ |  |  |  |  |
| 7.NS.2. | Apply and extend previous understandings of multiplication and division and of fractions to multiply and divide rational numbers: |  |  |  |  |  |  |  |  |  |  |
|  | a. Understand that multiplication is extended from fractions to rational numbers by requiring that operations continue to satisfy the properties of operations, particularly the distributive property, leading to products such as $(-1)(-1)=1$ and the rules for multiplying signed numbers. Interpret products of rational numbers by describing realworld contexts. |  |  |  |  |  |  |  |  |  |  |
|  | b. Understand that integers can be divided, provided that the divisor is not zero, and every quotient of integers (with non-zero divisor) is a rational number. If $p$ and $q$ are integers, then $-(p / q)=(-p) / q=$ $p /(-q)$. Interpret quotients of rational numbers by describing realworld contexts. |  |  |  |  |  |  |  | $\times$ |  |  |
|  | c. Apply properties of operations as strategies to multiply and divide rational numbers. |  |  |  |  |  |  |  | $\times$ |  |  |
|  | d. Convert a rational number to a decimal using long division; know that the decimal form of a rational number terminates in 0 s or eventually repeats. |  |  |  |  |  |  |  |  |  | $\times$ |
| 7.NS.3. | Solve real-world and mathematical problems involving the four operations with rational numbers. | $\times$ |  |  |  |  |  | $\times$ |  | $\times$ |  |

# Common Core Collaborative Cards - Number System (NS) \& Functions (F) 

Correlation to the Common Core State Standards

Grade 8 Deck
Know that there are numbers that are not rational, and approximate them with rational numbers.

| 8.NS.1. | Know that numbers that are not rational are called irrational. Understand informally that every number has a decimal expansion; for rational numbers show that the decimal expansion repeats eventually, and convert a decimal expansion which repeats eventually into a rational number. | $\times$ |  |  |  |  |  | $\times$ |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 8.NS.2. | Use rational approximations of irrational numbers to compare the size of irrational numbers, locate them approximately on a number line diagram, and estimate the value of expressions (e.g., $\pi 2$ ). |  | x |  |  |  |  |  |  |  |
| Define, evaluate, and compare functions. |  |  |  |  |  |  |  |  |  |  |
| 8.F.1. | Understand that a function is a rule that assigns to each input exactly one output. The graph of a function is the set of ordered pairs consisting of an input and the corresponding output. |  | x |  |  |  |  |  |  |  |
| 8.F.2. | Compare properties of two functions each represented in a different way (algebraically, graphically, numerically in tables, or by verbal descriptions). |  |  |  |  |  |  |  | x |  |
| 8.F.3. | Interpret the equation $y=m x+b$ as defining a linear function, whose graph is a straight line; give examples of functions that are not linear. |  |  |  | $\times$ | $\times$ | x | $\times$ |  |  |
| Use functions to model relationships between quantities. |  |  |  |  |  |  |  |  |  |  |
| 8.F.4. | Construct a function to model a linear relationship between two quantities. Determine the rate of change and initial value of the function from a description of a relationship or from two $(x, y)$ values, including reading these from a table or from a graph. Interpret the rate of change and initial value of a linear function in terms of the situation it models, and in terms of its graph or a table of values. |  |  | $x$ | x |  |  |  |  | $\times$ |
| 8.F.5. | Describe qualitatively the functional relationship between two quantities by analyzing a graph (e.g., where the function is increasing or decreasing, linear or nonlinear). Sketch a graph that exhibits the qualitative features of a function that has been described verbally. |  |  |  |  | $\times$ | x | $\times$ | x |  |
